ABOUT ME

Passionate information technology student eager to develop practical skills through internships in the IT industry. Possess a strong understanding of programming, web development. Experienced in creating web applications . Excited to apply knowledge in real-world situations, expand professional networks, and launch a successful career in the IT industry.

EDUCATION

- **Raharja University** Informatics Engineering Major - Software Engineering (GPA: 3.6/4.0)
August 2022 - Present

Skills

- **Programming Languages:** JavaScript, Java, Typescript, PHP
- **Frameworks & Libraries:** Vue.js, Tailwind, Node.js, Express.js, Next.js, Remix.js, Nest.js, Laravel
- **Database:** MySQL, MongoDB, PostgreSQL
- **VCS:** Git & GitHub

PROJECTS & EXPERIENCE

ViviBook — Full Stack Web Application

- Built an online bookstore with product catalog, cart, wishlist, and order features
- Developed RESTful backend using Express.js, MySQL, and Sequelize ORM
- Built customer-facing app with Next.js (TypeScript), Ant Design, and Tailwind CSS
- Developed admin CMS using React.js (TypeScript) for managing books and orders

Quiz-App - Static Web Application

- Created a responsive, interactive quiz platform with real-time scoring and a user-friendly interface.
- Utilized React.js for front-end development, implementing reusable components to streamline development.

WPU COURSE - Belajar MERN Stack

- Developed full-stack web applications through real-world projects using MongoDB, Express.js, Nextjs, and Node.js
- Built and integrated RESTful APIs with JWT authentication and modern frontend architecture, leveraging TanStack React Query for efficient data fetching and state management
- Utilized TypeScript and Swagger to improve code quality and API documentation

Full Stack Developer Intern - PT. Vanz Inovatif Teknologi | Jan 2025 – Jul 2025

- Integrated web & CMS frontends with RESTful backend services
- Built responsive UI components and dynamic features based on designs
- Designed CMS with full CRUD and clean architecture
- Developed modular backend APIs to support business logic

Full Stack Developer Intern - Universitas Raharja | Aug 2025 – Jan 2026

- Integrated Midtrans payment gateway for transaction flow, callbacks, and status handling
- Built IoT monitoring dashboard with Blynk integration for OrangeBox
- Implemented RBAC architecture and core CRUD features for HibahQu
